

I'm Altan, a specialized **UI/UX designer**. I have a career and talent in **front-end development** and **graphic design**. In my most recent role, I worked as a freelance designer. After a short break, I'm now ready to get back to work and focus on new goals.

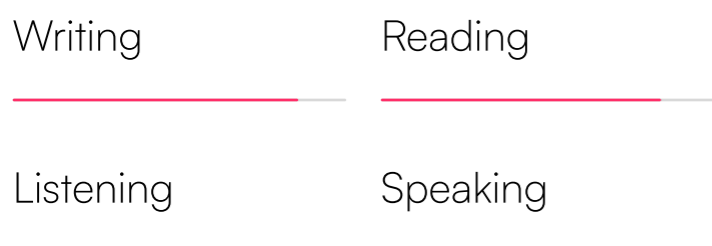

Reviewing my portfolio, you'll see that I primarily focus on the travel, information technologies, and digital media industries. However, I can easily adapt to other fields such as healthcare and logistics. I'm particularly skilled in designing ticketing systems, reservation platforms, and forms. I have experience with B2B, B2C, and startups. I enjoy simplifying complex systems and making them clear and user-friendly—that's the basis of user experience after all. I'm open to a new adventure.

Best Regards.
